

## Criss-Cross | New Woven Outdoor Lighting Collection

As we move towards summer, outdoor living takes center stage in how we entertain and dwell at home. Furniture and lighting that can survive the elements is essential in any alfresco space. This April Currey & Company debuts a woven outdoor collection of lighting pendants and sconces. With a nod to the ancient history of wickerwork, the company's design team has created a variety of woven styles with a non-traditional fiber that can withstand weather conditions while remaining durable. This modern material, all-weather wicker, is made of polyethylene (PE) which is a commonly used polymer engineered for food packaging. It was selected for its strength and flexibility and is non-toxic and recyclable. The fade and weather-resistant fiber is used to wrap the metal fixture frames and weave an open pattern onto the lighting design. With the revival of Bohemian-style, the new pendants and sconces give a casual and natural vibe to any outdoor space while providing practical illumination as the sun goes down.

Fishtrap Outdoor Pendant

Barbary Outdoor Wall Sconce

Barbary Fluted  
Outdoor Pendant

The Fishtrap Outdoor Pendant has a shade made of all-weather wicker that can easily withstand the elements, as will the metal hardware in a black powder-coated

finish. The sense of movement achieved by the slant of the weave makes the pear-shaped shade seem as if it is spinning. The single-light pendant is wet location tested, which makes it perfect for lighting patios and porches. This is a true statement piece for even the largest of outdoor rooms.

The Barbary Outdoor Wall Sconce has an inverted bowl-shaped shade made of all-weather wicker along with the metal backplate and gooseneck arm in a black powder-coated finish. The uniform weave on the wall sconce is painstakingly achieved by hand and a sophisticated detail is how the milk-glass globe on the one-light sconce glows through the circular cut out.

The Barbary Fluted Outdoor Pendant is made of all-weather wicker with a weather resistant rod from which it hangs in a black powder-coated finish. An artisanal aspect of this pendant is the intricacy of the uniform weave hand-tied to create the starfruit shape of its profile. The milk-glass globe on the one-light pendant will illuminate the shade to reflect textural images on nearby surfaces.

The All-Weather Wicker Outdoor Lighting Collection consists of nine distinct designs.
