

Arcus: Crystal Curves of Light.

Arcus - Brass

Seven or five glass panels hover along sweeping arcs in warm brass, catching light like liquid crystal. Shadows shift and glow, **controlled by a sleek remote**. Arcus elevates tables and grand entrances, turning illumination into a luminous, cinematic experience.

Arcus - Black

Panels of handcrafted glass float along sculptural arcs, **50" and 70"**, shimmering with every curve. Shadows and light dance across the room, warm or crisp at your command. **Arcus transforms dining tables, islands, or entryways** into scenes of quiet elegance and sculptural drama.
