WAC Group Introduces WAC HOME Collection to High Point Market Spring 2026

HIGH POINT, NC-- WAC Group will introduce the WAC Home Collection to retailers, designers and home furnishing professionals at the Spring 2026 High Point Market from April 25th through the 29th. WAC Home adapts as easily as you do, shaping light around your rhythm, your activities, and your mood. The offering will be available at the Schonbek/Modern Forms Showroom, #IHFC H327, on the third floor of the International Home Furnishings Center.

Lighting should feel as natural as living- supporting how you move through your day, responding without effort, and quietly enhancing every moment at home. Soft transitions through lived-in residential spaces from morning clarity, to afternoon energy, to an evening scene that settles into a warm, calm glow.

Great lighting is built in layers, and general illumination sets the foundation. Task lighting brings focus while decorative accents add warmth and expression. WAC Home now brings every layer together into one connected experience with select luminaires from across WAC Group brands: performance-driven solutions from WAC Lighting, recently added sculptural designs from Modern Forms, and statement pieces from Schonbek.

With Tunable White and Dim-to-Warm technology, light transitions naturally from crisp and energizing to soft and inviting. The materials appear true and the spaces stay visually balanced and cohesive. Control is intuitive. With the MyWAC App, WallStation, and WAC-Mesh wireless control, the user can adjust individual

fixtures or entire rooms in seconds. Tap a button, glide a dimmer, or speak a command, and your home lighting will respond instantly.

For spaces not connected to the app, WAC Home-compatible fixtures deliver Tunable White and Dim-to-Warm and default to a comfortable 3000K, providing warm, consistent illumination right out of the box. These fixtures are also fully compatible with standard ELV and TRIAC dimmers, ensuring smooth, reliable dimming without added complexity.

Introducing New WAC Home Collection Luminaires

The innovative, connected WAC Home Collection now includes select lighting fixtures from Schonbek and Modern Forms.

The new Schonbek fixtures include Amoureux, Josefina and Wraparound.

Sleek and sculptural, Amoureux pairs modern geometry with crystalline precision. An elongated Optic Crystal pendant is suspended within an angular, pyramid-inspired metal frame, creating a dynamic interplay of form and reflection from integrated LEDs. The design strikes a refined balance between minimalism and visual impact that elevates contemporary interiors.

Drawing its dramatic presence from the angular beauty of icy mountain peaks, Josefina sparkles from faceted diffusers filled with Radiance® Crystal Dust that rise like sculpted ridgelines. Light refracts through the layered geometry, creating a crystalline glow that feels both crisp and atmospheric. Geometric planes intersect to form an unexpected, architecturally bold silhouette that provides visual contrast against the luminous surfaces.

A powerful beauty, Wraparound captures movement frozen in time. A cascade of concentric metal spirals appears to twist gently through the air, each curve punctuated by faceted crystals with Radiance® Crystal dust, which shimmer with sculptural brilliance. Integrated LED illumination enhances the dynamic form, casting lively reflections that dance across the spirals.

New Modern Forms Luminaires include Cinaplex, Keefe and Poplin:

The new Cinaplex Linear Pendant transforms architectural lighting into an artful composition of light and form. Featuring nine individually blown glass elements that can be aligned symmetrically or staggered for a dramatic rhythm, this

statement fixture delivers both upward and downward illumination for a sophisticated, dimensional glow. Designed for contemporary interiors, Cinaplex embodies an educated, charismatic design philosophy that merges artistry with performance. Cinaplex brings an aura of luxury and precision to any interior setting.

Combining industrial precision with a sculptural presence, the Keefe Pendant redefines architectural lighting with a bold, circular silhouette that feels both industrial and elevated. Keefe diffuses a soft, even glow that enhances modern interiors with depth and warmth. Its graphic form and precision detailing make it more than a source of light — it's a sculptural centerpiece that commands attention. Ideal for dining areas, foyers, or great rooms, Keefe's geometric composition brings dynamic energy to any space.

Featuring soft texture and a bold presence, the Poplin Pendant reimagines classic textile design for the modern interior. A sculptural drum form wrapped in elegant fabric diffuses light with gentle warmth, creating a soft, inviting ambiance that transforms the mood of a room. Suspended by chains, Poplin's refined silhouette balances tactile texture with architectural structure, making it a versatile centerpiece for contemporary spaces. The result is a fixture that's as timeless as it is current — a perfect fusion of comfort, craftsmanship, and modern design.

WAC Home is designed for today and ready for what comes next. As your space evolves, your lighting adapts with it. The system is flexible, scalable, and future-ready.

About WAC Group

For over 40 years, WAC Group has redefined what lighting can do. From residential to large-scale architectural projects, the company has built a reputation for innovation, quality, and design that transcends boundaries. Today, WAC Group is the global identity behind WAC Lighting, WAC Architectural, Modern Forms, and Schonbek—united by a single mission: to bring smart, sustainable, and beautiful light to every environment.
